

Lisandro Fernando

AI Engineer | Agent Systems | Automation & Intelligent Workflows

Monterrey, México | +52 81 8054 6960 | lisandrusfernandus@hotmail.com

PROFESSIONAL SUMMARY

AI Engineer with experience designing and implementing intelligent agent-based systems using prompt chaining, routing, parallelization, and orchestrator-worker models. Strong background in Python, automation, and cloud systems.

CORE SKILLS

- AI Agents & Multi-Agent Systems
- Prompt Engineering & LLM Applications
- Python, REST APIs
- AWS, Azure, Docker, Kubernetes
- CI/CD, Terraform
- Monitoring (Splunk, Kibana)

AI PROJECT EXPERIENCE

- Built AI agents using prompt chaining for reasoning workflows
- Implemented routing systems for dynamic AI responses
- Designed parallel execution pipelines
- Developed orchestrator-worker architectures

PROFESSIONAL EXPERIENCE

Accenture – Site Reliability Engineer

2025 – Present

- Integrated AI agents to improve coding efficiency
- Built CI/CD pipelines and cloud architectures

Globant – DevOps Engineer

2023 – 2025

- Automated deployments and improved system performance

Previous Roles – Automation Engineer

- Built scalable automation frameworks
- Reduced manual processes significantly

KEY ACHIEVEMENTS

- AI agent resolving 90% of queries
- Reduced manual effort by 90%
- Improved deployment efficiency by 80%+

EDUCATION

Master's in Science & Engineering

Bachelor's in Automation Engineering

LANGUAGES

Spanish, English, Portuguese, Chinese
